**Title:** Evaluation of the Phytotoxicity of Six Experimental Aqueduct Formulations Applied on Creeping Bentgrass Putting Greens in August

**Objective:** To evaluate the phytotoxicity of six experimental Aqueduct formulations applied on a creeping bentgrass putting green in August.

**Location:** A mature plot of SR1020 creeping bentgrass located at the UCR Turfgrass Field Research Facility.

**Duration:** 3 days

**Funding Source:** Aquatrols

**Findings:**

- We observed no phytotoxicity of all new experimental Aqueduct formulations.

**Status:** The study was completed and a final report was prepared.
